

The LightningAir Purification Systems

The work horse is the commercial unit. It is a heavy duty O₃ sanitizer for professionals. It will remove strong odors at their source in a short period of time. The LA-IC4 is for use in unoccupied spaces. Nature has many ways to produce ozone O₃, a natural sanitizer. For example, we've all taken a walk after a thunderstorm and experienced the clean, fresh smell in the air. That's ozone, or activated oxygen, at work. O₃ attacks microorganisms and breaks down odors and other pollutants at their source. Normal oxygen O₂ is converted to O₃, which is commonly called ozone. O₃ will break down odors and other contaminants. The LightningAir employs a special O₃ generator to achieve this natural process. The LightningAir LA-IC4 will oxidize odors and eliminate them. It generates O₃ or ozone which disburse into the area to be treated. The O₃ sanitizes the entire area to eliminate odors at their source. The LightningAir LA-IC4 is portable so it can easily be moved from one problem location to another.

The Lightning Air home unit blends into your home decor. The ionic purifier clears the air of: Household Dust, Tobacco Smoke, Pet Dander, Pollen, Mold Spores, Dust Mite, Dust, Insect Debris. The sanitizer creates ozone that breaks down odors and other pollutants at their source without the use of fragrances. Ozone (O₃) is created in Nature by lightning and gives off a clean, fresh smell after a thunderstorm. The ozone Sanitizer will eliminate or reduce odors from: Pets, Tobacco, Cooking, Carpets, Musty Closets, Damp Basements, Mold and Mildew, Viruses and Fungi, Bedrooms and Bath, Recreational Vehicles, Automobiles, Boats/Yachts, Remodeling Fumes. These units come in solid hard wood (Cherry, Oak, or Walnut).
